

Program 11) write a function that prints a dictionary where the keys are numbers between 1 and 5 and the values are cubes of the keys.

```
def cubes():  
    dict={}  
    for i in range (1,6):  
        dict[i]=i**3  
    print(dict)  
cubes()
```

output=

```
{1: 1, 2: 8, 3: 27, 4: 64, 5: 125}
```
